Project Design Phase-I
Solution Architecture

Date	31 January 2026
Team ID	LTVIP2026TMIDS36686
Project Name	Project – Strategic Product placement Analysis: Unveiling Sales Impact with Tableau Visualization

Solution Architecture:

The " Strategic Product placement Analysis: Unveiling Sales Impact with Tableau Visualization" workbook is designed to be cloud-enabled (Tableau Server/Tableau Online), ensuring seamless accessibility and collaboration across teams. The solution is built to scale from a single sales region to a multi-country enterprise environment by simply integrating additional data sources and connectors. This flexible architecture allows organizations to expand analytics capabilities, monitor real-time sales performance, and support data-driven decision-making at every level of the business.
